Commentary

- 7 **Russia and Ukraine** *Samuel Charap and Keith Darden*
The West has often assumed that Russia is inherently hostile to Ukraine, and the March events seem to validate that assumption. But Moscow's moves are in fact a real departure from previous Russian policy.
- 15 **The Euro Goes to Court** *Erik Jones and R. Daniel Kelemen*
Germany's highest court stopped short of ruling the European Central Bank's programme to support the euro illegal. Now the European Court of Justice must find a way to make the programme acceptable without making it ineffective.

- 27 **The EU Without the Euro** *François Heisbourg*
The single currency was supposed to have led to greater political union, but the policies taken to ensure its survival are having the opposite effect. An orderly retreat from the euro might be the EU's least-bad option.
- 49 **The End of the Turkish Model** *Omer Taspinar*
The Turkish model of democracy, economic competence and regional influence is not unravelling because of a clash between Islam and secularism. The real conflict is between electoral democracy and liberalism.
- 65 **Is Iran a Military Threat?** *Shahram Chubin*
Tehran's military capabilities do not match its ambitions for recognition and status. It is cautious, defensive and prudent in resorting to force, due as much to experience as to realism about its own limits.
- 89 **Narrative and Conflict in the Middle East** *Rolf Tanner*
Narratives that dramatise and simplify conflicts should be corroded by exposure to complex reality. Yet they retain their mobilising power in the Middle East, topped up by conspiracy theories.
- 109 **Land and Rebellion: Lessons for Counter-insurgency** *Ethan B. Kapstein*
A study of land reform illuminates the paradox of economic instruments in counter-insurgency. Where redistributive demands are at the core of a rebellion, foreign powers will find it difficult to respond effectively.

- 129 **The Problems of the Liberal Peace in Asia** *Oriana Skylar Mastro*
The conviction that economic ties will engender peace is a lynchpin of US strategy, but Asian leaders view failure to protect territorial claims as worse than the losses associated with a limited war.
- 159 **Has Britain Found its Role?** *David M. McCourt*
The question is not whether Britain is a great power, but whether it does what great powers do. In the absence of wider changes, Britain will continue to play this role.

Review Essays

- 179 **Gates's Wars** *Ben Fishman*
Robert Gates takes deserved pride in his achievements at the Pentagon. But he leaves an important part of the debate about America's future role in the world unaddressed.
- 187 **Photography at War** *H.R. McMaster*
A thematic selection and analysis of war photography across 165 years has tremendous explanatory power about the nature of modern war and the human experience in war and its aftermath.
- 199 **Chile Can Say No** *Britta Crandall*
Two recent books tell the story of the transition to Chile's now-vibrant democracy. Their complementary perspectives provide context for the choices Chileans made in last year's presidential elections.

Closing Argument

- 235 **Russia's Breaking Point** *Nicholas Redman*
As Russia mulls its next move in Ukraine, consideration of its allies' reactions might have greater weight than the response of the West.
